

## FLEET TRACKING - TRANSPORTATION

### THE SYSTEM

Ideal for fleets of all types and sizes, Cypress offers fleet tracking solutions with GPS hardware and a web-based application.

By knowing the exact location of your vehicles you can save time, money and protect your valuable assets.

### SAVE TIME

- Increase employee productivity by reducing driving time
- Eliminate scheduling inefficiencies
- Reduce unauthorized trips and stops
- Reduce overtime

### SAVE MONEY

- Save fuel costs by eliminating inefficient routes
- Monitor driver habits, such as excessive braking and acceleration
- Decrease high cell phone bills

## PROTECT YOUR VALUABLE ASSETS

- Provide security to your drivers - equip your worker with a Man Down Pendant so in an emergency, an alarm notification will be deployed with the vehicle's location.
- Protect against theft and unauthorized after hours vehicle use - this system will send you a notification if the vehicle is moving when and where it shouldn't.

## WHY OUR SYSTEM IS BETTER

- Wireless router functionality - plug your laptop into our modem and web browse, check email and in-car map.
- Direct, knowledgeable, no strings attached support. Because we manufacture the product, there's no middle-man hoops to jump through.

## HOW IT WORKS

- A modem installs into a vehicle
- The modem positions itself using embedded GPS technology
- It then wirelessly communicates vehicle data using cellular technology
- Data is securely directed to our server via the internet
- Access fleet information from any computer with a web browser
