

GARMIN INTEGRATION

Go beyond one way communication. Our Garmin integration provides a simple yet powerful 2-way messaging system between drivers and dispatch.

In-Vehicle Solution

- Dispatchers create a message and send it to the vehicle operator
- Vehicle operators respond using simple canned responses or type their own messages into the Garmin
- The dispatch can send routing information to the Garmin device

Benefits

- Manage and identify vehicle operators
- Dispatch and fleets work together
- Lower fuel costs
- Improve response and customer service
- Maximize efficiency to save time and money
- Optimize resources
- Improve risk management

GARMIN INTEGRATION

Get all the benefits of a Garmin plus extended function with the integration of our Chameleon Modem.

How it Works

- A single cable connects a Garmin device to a Chameleon Modem
- The Chameleon Modem provides a wireless connection from dispatch to vehicle operators
- Combined with monitoring software, dispatch can view and manage vehicles
