

RANGE EXTENDER

BENEFITS

- Extends the range of the Man Down Pendant allowing you to fully utilize its capabilities
- Save money by eliminating the need for multiple modems
- Increase worker safety by providing a greater area of intrinsically safe device coverage

FEATURES

- Acts as a hopping point to “relay” messages across longer distances
- Weatherproof for outdoor mounting
- Supports multiple Man Down Pendants and Gateways simultaneously

HOW IT WORKS

- A truck installed with a Modem and Gateway parks as close as possible to the work site
- Range Extenders are placed at key positions to provide extended coverage
- The Man Down Pendant/Gateway combination uses the Range Extenders to communicate over greater distances
